

## COUGAR 8250 HIGH TEMPERATURE GREASE

Cougar 8250 High Temperature Grease is manufactured from an Inorganic Thickener containing Semi-Synthetic base oil with an advanced additive system.

Cougar 8250 is a High Performance, Non-Melting Grease designed to withstand high temperatures over extended re-lubrication periods providing superior lubrication to Plain and Anti-Friction Bearings.

It is ideally suited for applications in or close to high temperature environments e.g.Exhaust Fans, oven conveyors, kiln car bearings, soot blowers.

Cougar 8250 also provides excellent lubrication at low ambient temperatures which makes it extremely versatile in all applications.

### FEATURES & BENEFITS

- Excellent mechanical stability under vibration conditions
- Wide operating temperature range
- Long re-lubrication service life at High Temperatures
- Resistant to mild acid and alkaline wash
- Non-Melting – will not run out of bearings

### TYPICAL CHARACTERISTICS

Grade CG	8250
Appearance	Smooth Grease
Colour	Golden/Orange Sparkle
NLGI	2.5
Thickener	Inorganic
Dropping Point	None
Base Oil Viscosity cSt @ 40 °c	400
Copper corrosion IP 112	Pass
Four Ball Weld Load IP 239	250Kgs
Operating Temperature Range	-25 °c to +230 °c*

\*Operating Temperature Range based upon normal lubrication intervals
